

Renewable Energy

Innovation Meets Expertise

The way we generate and use energy is continually changing as we innovate and shift toward renewable sources. As an industry leader in innovation, Berkley Fire & Marine strives to meet the needs and challenges of our contractors and insureds. Our uniquely designed renewable energy coverage addresses the risks associated with this growing sector.

Solar panel installation has seen exponential growth over the last decade. New technology and manufacturing innovations have lowered the cost of panels and allowed the everyday consumer and business owner to afford and see the benefits of solar power. Installing solar panels and their ability to generate energy are key risks we protect with our renewable energy coverage.

Wind turbines are an excellent source of passive and limitless energy. The installation and testing of these turbines requires a contractor with experience and expertise in renewable energy. Berkley Fire & Marine supports contractors with the claims expertise and service they need to keep projects moving.
